

What happens when
wolves leave wolf
island?

I will show what happens
after every season on this
island.

From when the
wolves leave to when
they come back.

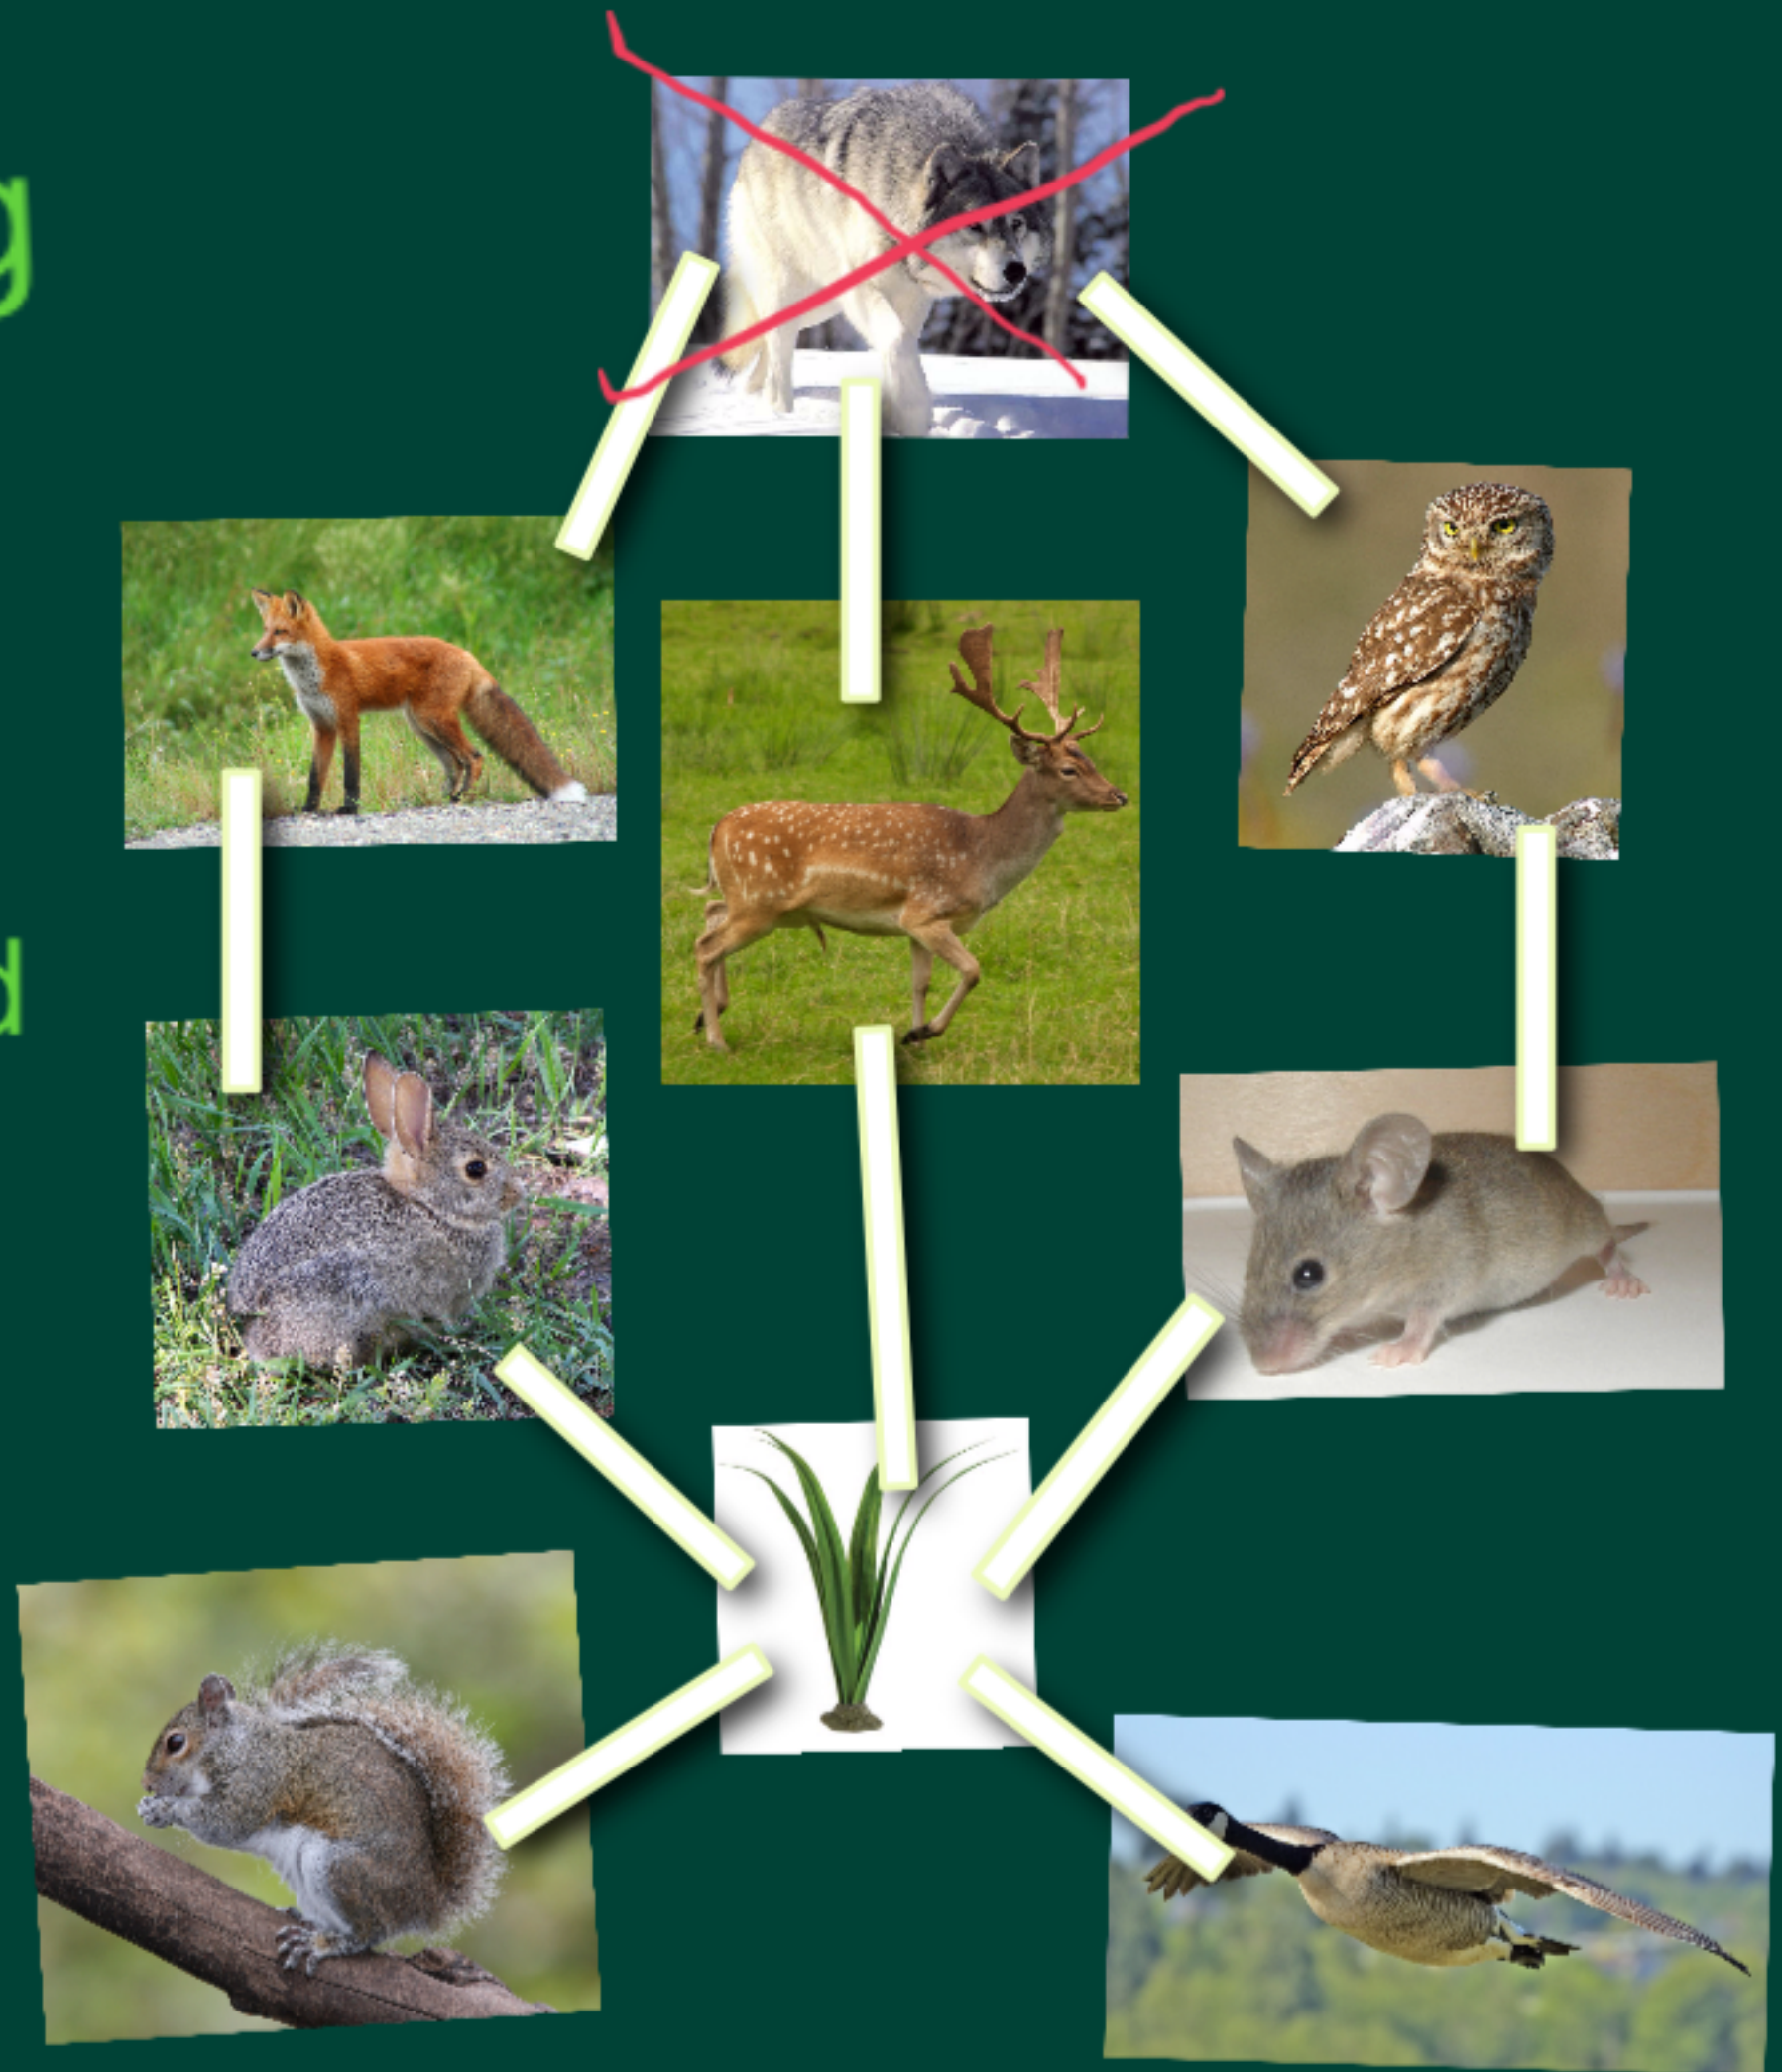

See what
happens.

Year 1: spring

What's the scoop?

Wolves leave island to the main land.

Everything is still running smooth on the island.

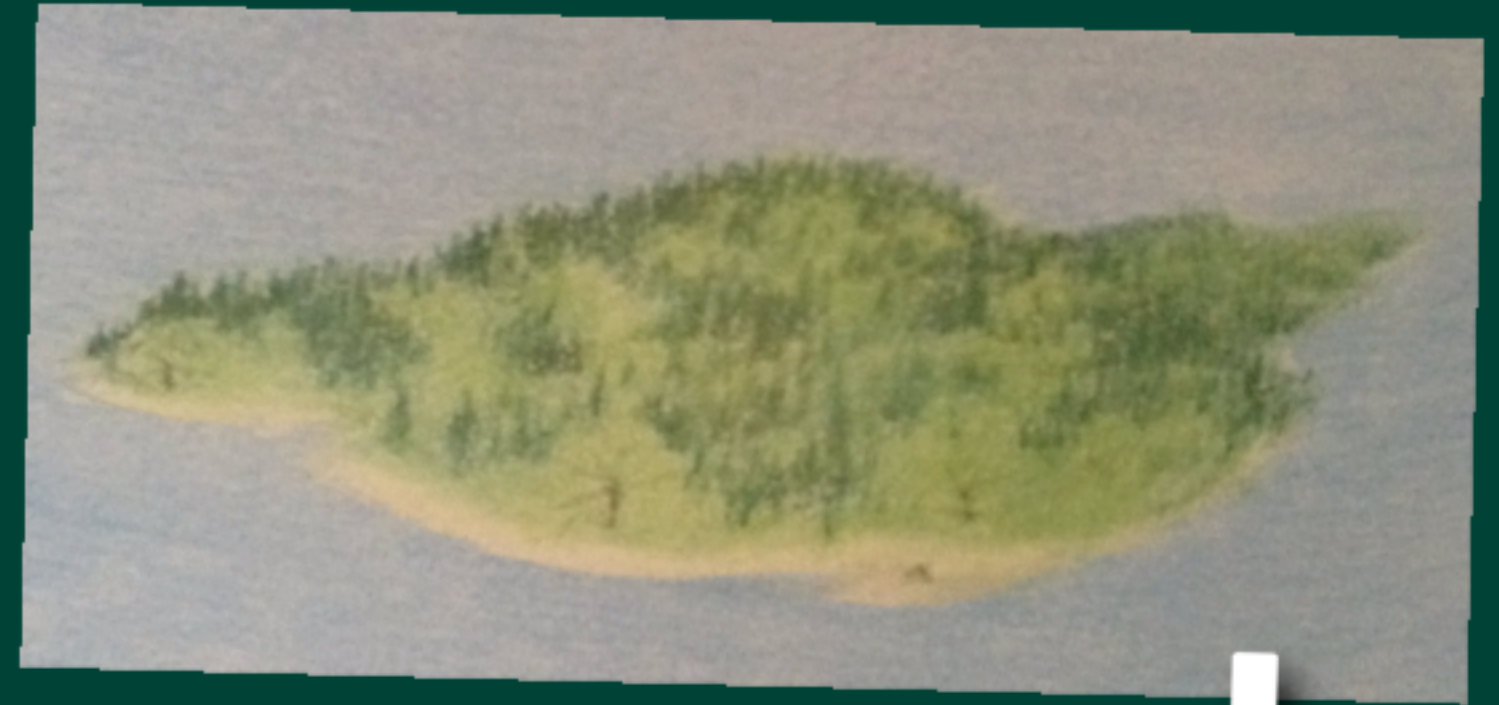

Year 1:fall

What's the scoop?

Geese flew south and squirrels stored nuts for the winter.

Everything is still going well.

Store nuts

South

Leaves turn colours

Fly south

Year 1: winter

What's the scoop?

Mild winter this year
and animals found
enough to eat.

Everything is well.

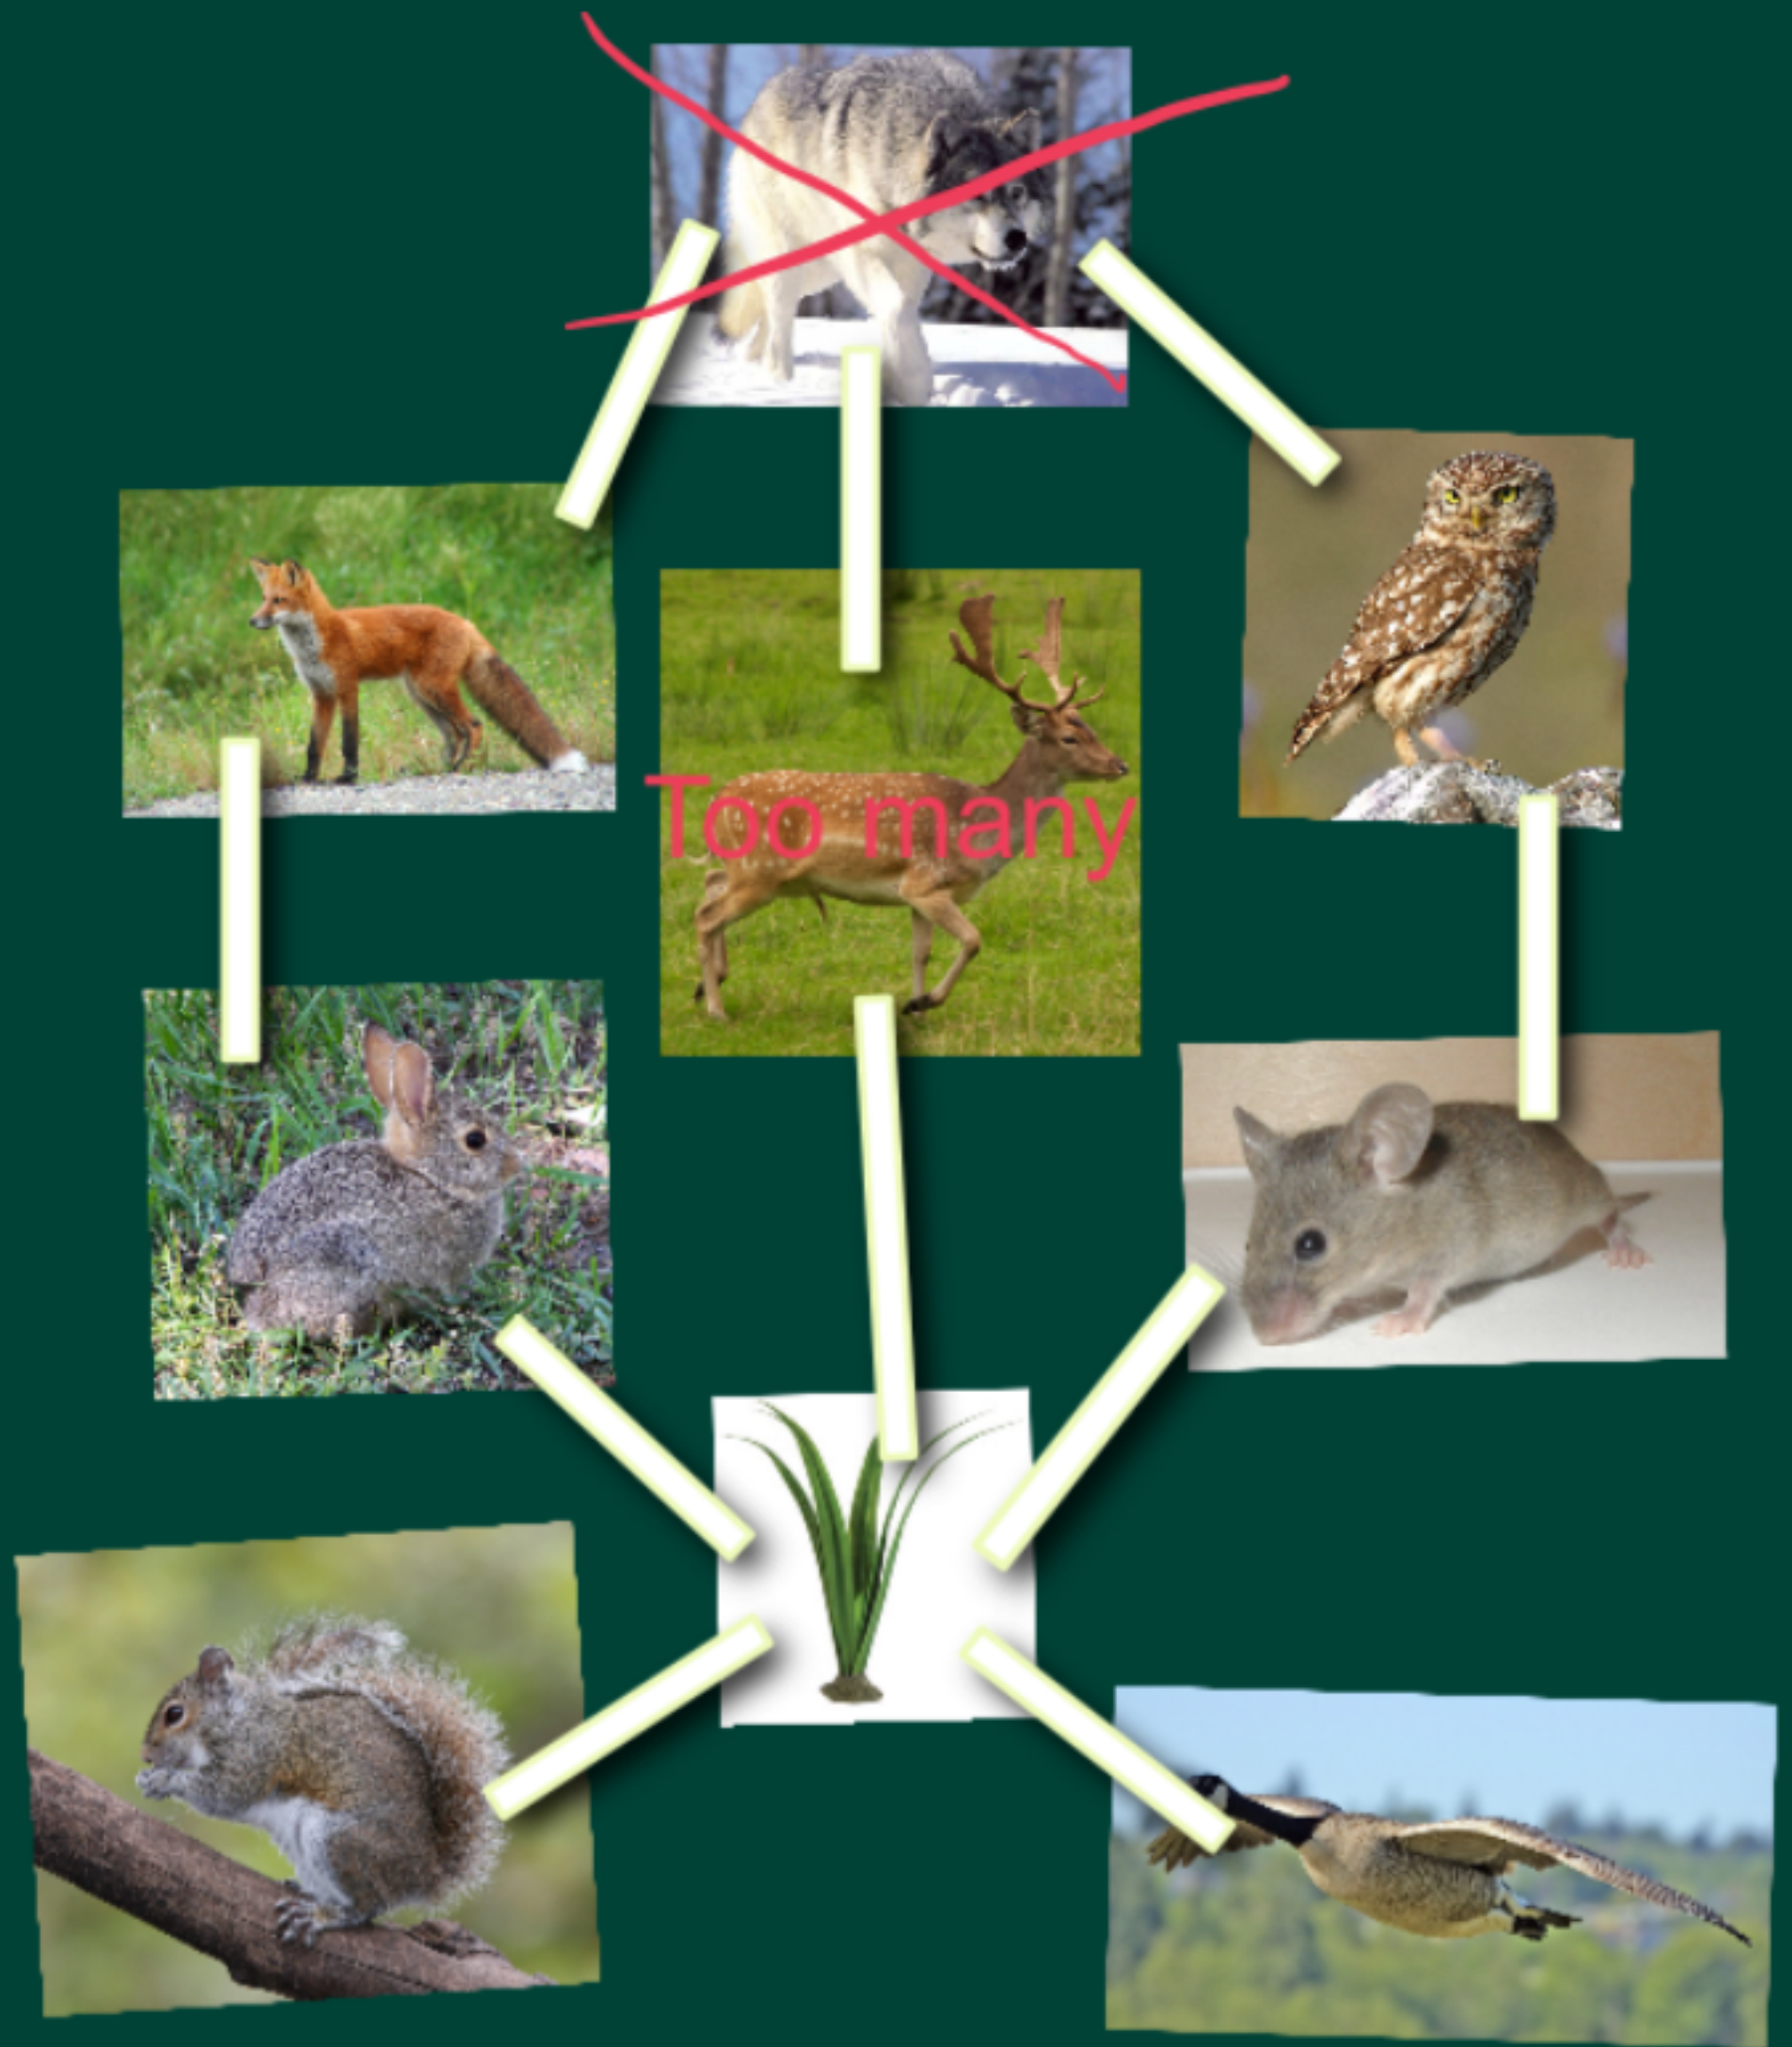

Year 2: spring

What's the scoop?

Lots of fawns were born that year and there was not enough food on the island

Everything was not so well.

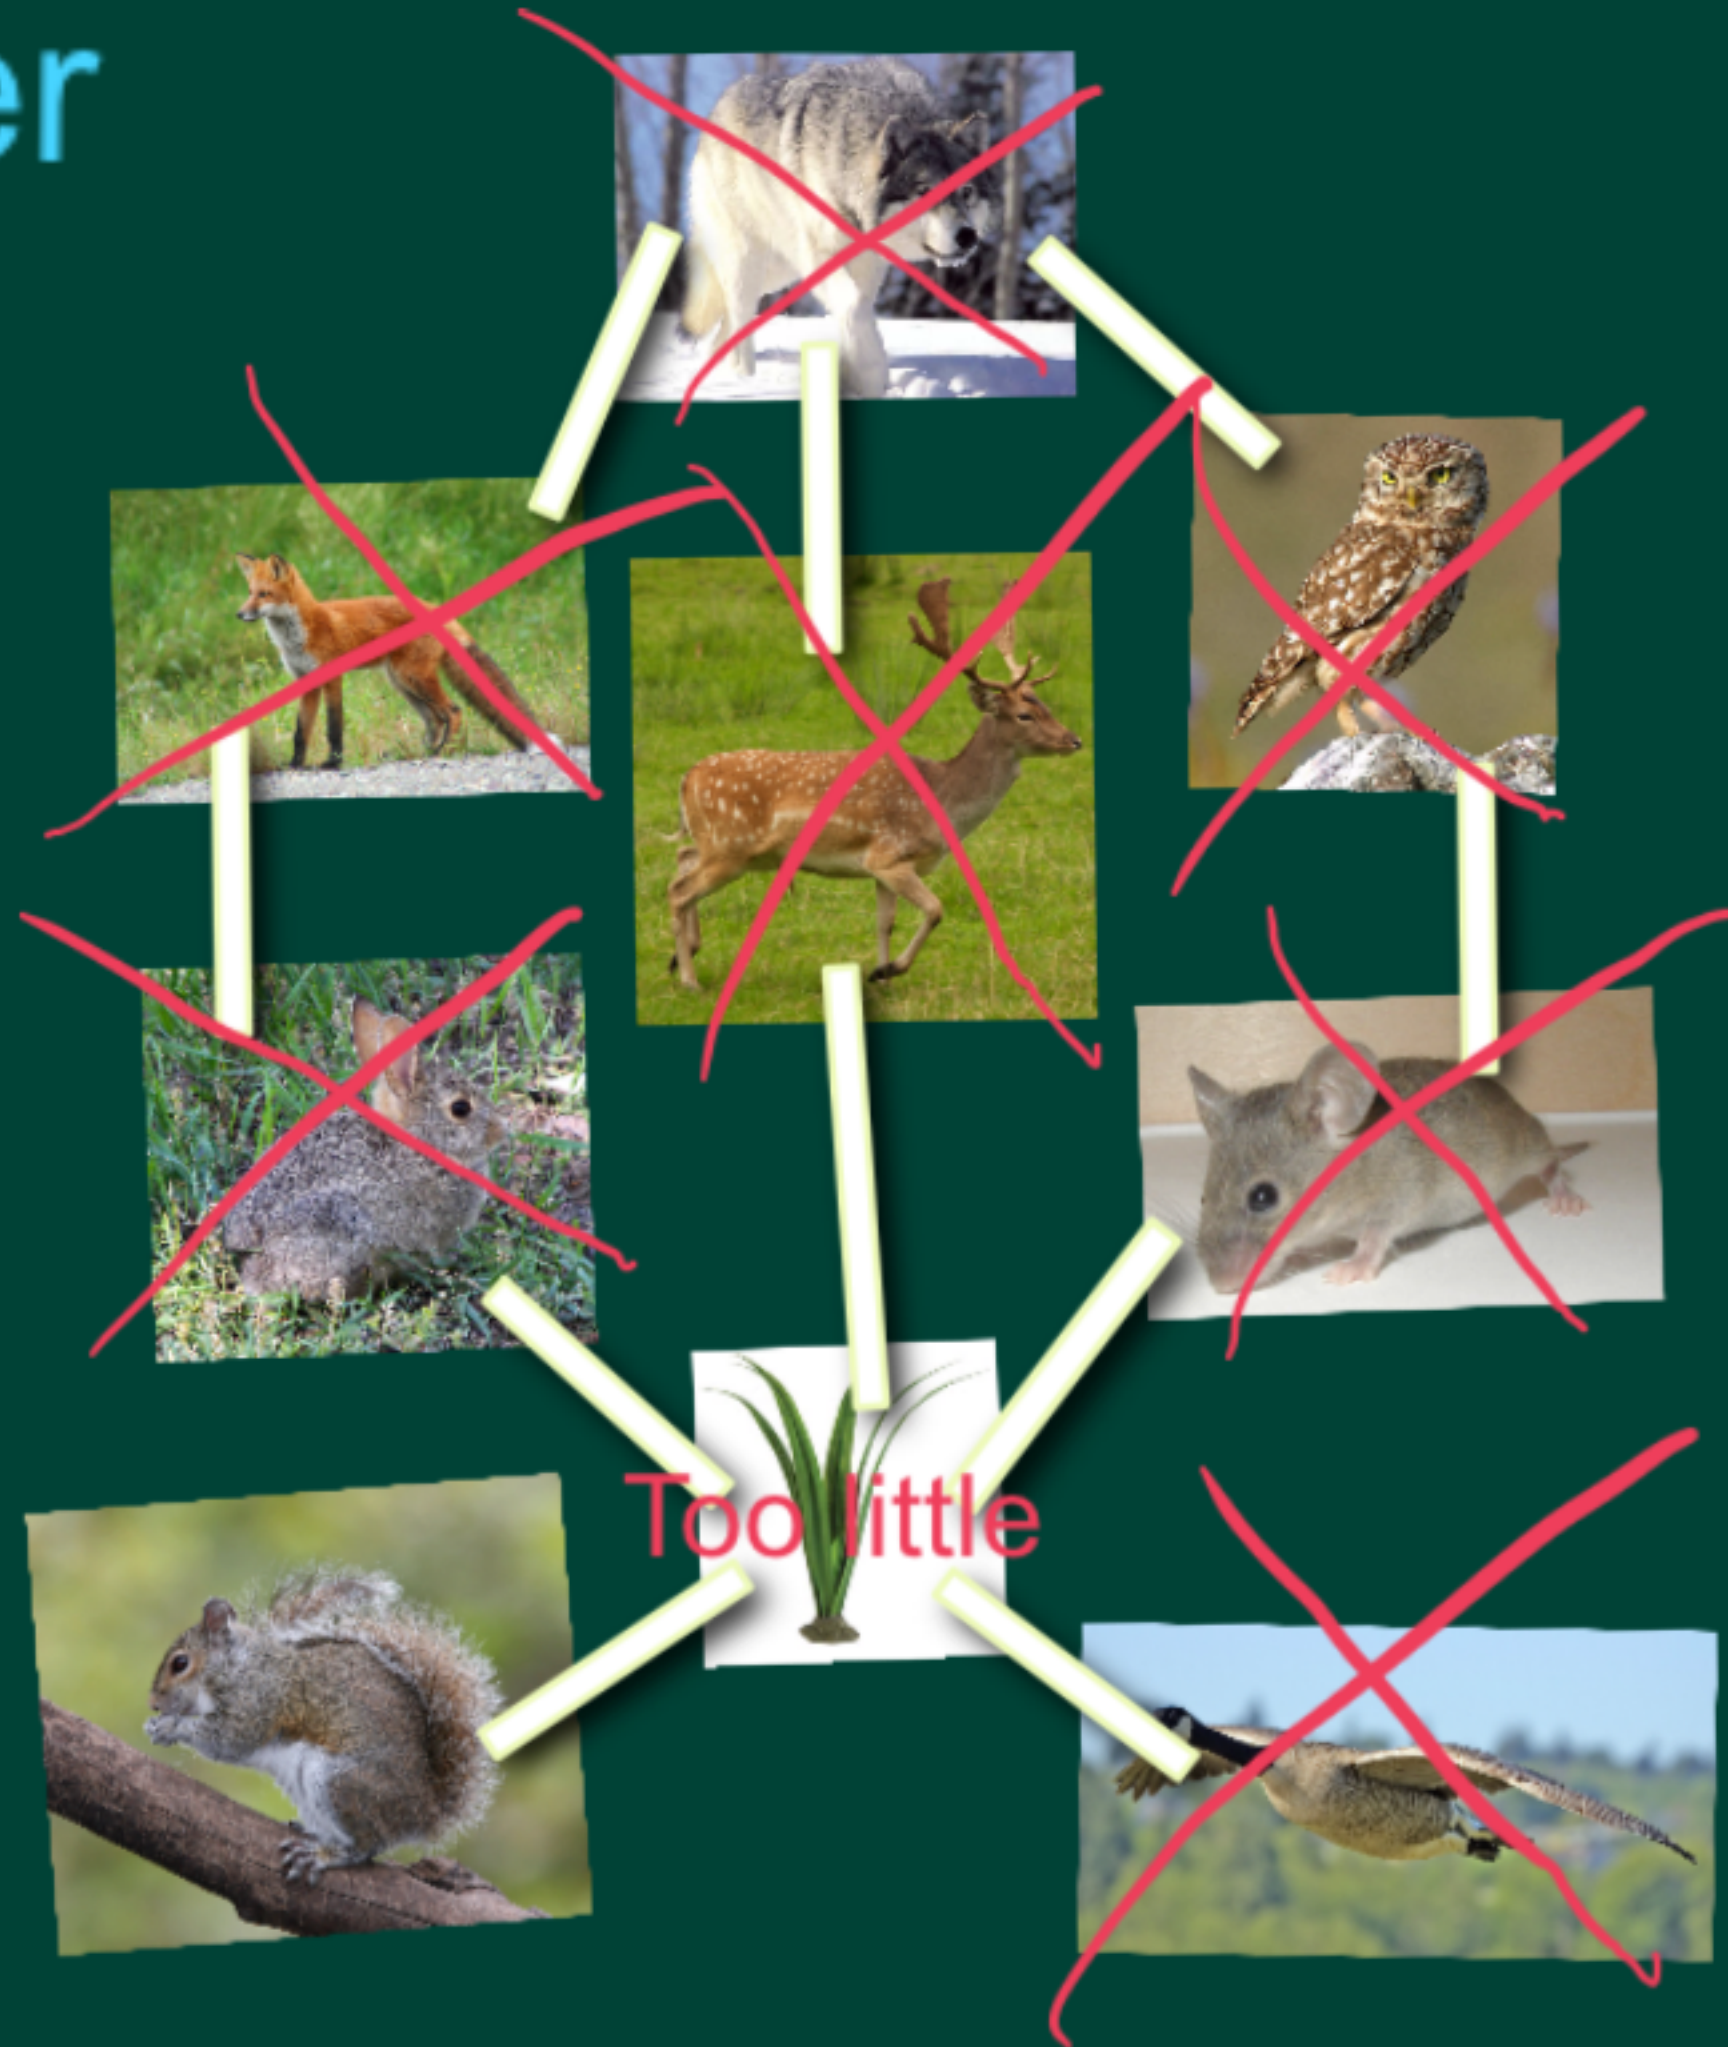

Year 2: Winter

What's the scoop?

Species after species were dieing. Only squirrels were okay because their supply of nuts.

But since the winter was so strong the water froze and the Wolves could cross back to their island on the ice.

Think

Imagine the wolves could not come back for three years.

How do you think the wolves lived on the mainland?

Humans are at the top of the food chain like the wolves on the island. What are our responsibilities?

What do you think would happen to the squirrels if they did not store nuts?

The end
